Welcome!

IMPROVING THERAPEUTIC ENGAGEMENT SKILLS

David S. Prescott, LICSW

TAKE HOME MESSAGES

• What you do matters
• What you do works
• Follow the research
• Be data driven
• Beware of false advertising
• Always keep the big picture in mind

WHAT’S OUR GOAL?

• Stopping the behavior?
• Justice for the victim?
• Preventing re-offense?

WHAT WORKS?

• Do we want them to re-offend or not?
• What can we do?
• Who should we be?
• Is that enough?

MY MOTIVATION

Problems:

✓ Disrespect by many professionals of the earliest phases of treatment
✓ Implicit assumptions of many professionals
  • “treatment is a privilege” vs. change is a right
  • “I only accept you if you accept my timetable for change”
BEFORE YOU PAINT YOUR HOME...

- This is the first step to change
- This is treatment

REALITY

- We need to...
  - build willing partners in change
  - build treatment completers
  - build responsivity

EFFECTIVE PROGRAMS

RESPONSIVITY principle

- Effective programs are those which are responsive to client characteristics
  - cognitive abilities
  - maturity
  - motivation
  - mode of intervention
  - scheduling concerns
  - neurological impact of trauma

RELATIONSHIP PROBLEMS

LEARNING DIFFICULTIES

HYPERACTIVITY
COMMUNICATION DIFFICULTIES

PARADOXICAL COMMUNICATION

- You need to be more motivated to change.
- Treatment holds the promise of a “good life”.
- It is our job to point out your thinking errors; however, it is not acceptable for you to observe when we are using thinking errors.
- We expect you to demonstrate meaningful and consistent behavioral change within a highly controlled environment.
- You need to participate fully in treatment regimens that we professionals cannot agree on ourselves.

COGNITIVE RIGIDITY

AMBIVALENCE

- I want to work with you, and I don’t want to sacrifice myself
- I want to change, and I want to be respected
- I want to be in treatment, and I don’t want to be in a one-down position
- I want to look at myself, and I don’t want to feel less of a man
- etc. etc. etc. etc.

MARSHALL, 2005

- Warm
- Empathic
- Rewarding
- Directive

Problem: Many people think they have these qualities, but don’t
Walfish et al., 2012
- No differences in how clinicians rated their overall skill level and effectiveness levels between disciplines.
- On average, clinicians rated themselves at the 80th percentile
- Less than 4% considered themselves average
- No one rated themselves below average
- Only 8% rated themselves lower than the 75th percentile
- 25% rated their performance at the 90th% or higher compared to their peers

DIRTY LITTLE SECRETS
• ... from outcome studies
  - More difference between the best and the worst therapists within any treatment method, than there is between treatment methods
  - Some therapists are better than others
  - Hiatt & Hargrave (1995) asked therapists to estimate their effectiveness in a treatment study
  - The LEAST effective therapists rated themselves as being among the most helpful

JUST ONE GUY?
• 581 therapists
• 6,146 real world clients
• Average sessions = 10
• 46% depression, 30% adjustment disorder, 11% anxiety, plus other diagnoses
• Who got the best outcomes?
  - Training makes no difference
  - Profession makes no difference
  - EXPERIENCE makes no difference
  - Diagnosis makes no difference

PROFICIENCY VERSUS EXCELLENCE
• Proficiency in most fields can be obtained within 6 months
  • The same goes for therapy
    - Most people are at their most effective 1 year after licensing/registration
    - Confidence improves throughout career
    - Competence does not
      - Particularly important consideration in risk assessment
ALLEGIANCE BIAS
- Professionals’ allegiance to their models and techniques can be as important as the models and techniques they use.
- Placebo effects
- Example: good lives model versus relapse prevention

ADVERSARIAL BIAS
- Boccaccini, Murrie, et al.
  - Scores on measures such as the PCL-R and Static-99r can vary in response to who is paying for the evaluation.
  - “You gotta dance with the one that brung ya”

OTHER CLASSIC BIASES
- Confirmation Bias
- Fundamental Attribution Error

TAKING THIS A STEP FURTHER...
- Consider your biases regarding sex crimes and sex offenders in general.

THIS MAY NOT BE TRUE...
- But consider the statement: "All judgment is a form of violence"
- Or at least it gets in our way of understanding our clients
- Clients who don’t feel understood or respected are less likely to engage meaningfully

TAKE-HOME SKILL
- Accept and embrace the fact that you have these biases.
- Then let them go...
- And get on to the work of connecting with your client.
- You can always return to these biases later!
GET GROUNDED IN THE THERAPEUTIC FACTORS OF TREATMENT

Strategy #2

THERAPEUTIC FACTORS
• AKA "Common Factors"
• Factors common to all bona fide therapies

FACTORS INFLUENCING OUTCOME

VARIANCE (GRATITUDE TO JEB BROWN)
- Unexplained 74% (external stressors, health condition, social supports, etc.)
- Azalea (intake score) 15%
- Diagnosis, age & sex 7%
- Clinician 6%
- Treatment method 1%

RECOMMENDED SOURCE

IMPLICATIONS FOR PROFESSIONAL DEVELOPMENT
• Study your population deeply
• Study each client deeply
  Expertise at engaging with clients involves moving from the micro to the macro as well as vice versa
• Use models and techniques in the service of developing yourself professionally.
USE APPROACH GOALS

Strategy #3

GOALS
- Avoidance goals:
  - Associated with negative affect, psychological distress, impairment in psychological functioning, impairment of self-regulatory capacity in situations of stress
  - Require considerable cognitive resources to attain and maintain
- Approach goals:
  - Motivate individual to achieve desired states/outcomes
  - More easily attained than avoidance goals
  - Associated with positive affect, reduced cognitive load, less deterioration in self-regulatory ability, lower levels of psychological distress

APPROACH/AVOIDANCE (FROM PRESCOTT/WILSON)
- I don't want any more victims.
- I don't want to smoke anymore.
- I don't want any more trouble with the law.
- I don't want any more violence towards my partner.
- I don't want to use drugs or alcohol to excess anymore.
- I don't want to gamble any more.
- I have been ordered to stay away from the victim of my crime.
- I don't want to be on probation.
- I don't want to look stupid.

TREATMENT PLANS
- Mr. X will reduce his risk
- Mr. X will take all his medications
- Mr. X will work on his sexual preoccupation
- Mr. X will pass his polygraph
- Mr. Y will manage all risks successfully
- Mr. Y will work with his psychiatrist to determine the most effective treatment
- Mr. Y will develop healthy sexual outlets
- Mr. Y will be honest with himself and others

FROM MY CASELOAD
- Mr. X will demonstrate to others that he has changed
- Mr. X will become the person he wants to be
- Mr. X will improve his relationships with others
- Mr. X will work to prevent further allegations

BE TRAUMA-INFORMED

Strategy #4

And I mean really trauma-informed
**WHAT IS TRAUMA?**

- PTSD
- Complex PTSD
- DESNOS
- Complex trauma
- Developmental Trauma Disorder

**KEY THEME...**

- Just notice
- See what happens next
  - Not just mindful...
  - Investigating each experience

---

**WHAT IS TRAUMA?**

- Trauma is the desperate hope that the past was somehow different.
  - Jan Hindman

**WHAT IS TRAUMA?**

- APA:
  - Trauma is an emotional response to a terrible event like an accident, rape or natural disaster. Immediately after the event, shock and denial are typical. Longer term reactions include unpredictable emotions, flashbacks, strained relationships and even physical symptoms like headaches or nausea. While these feelings are normal, some people have difficulty moving on with their lives. Psychologists can help these individuals find constructive ways of managing their emotions.

---

**ABSENCE OF CURIOSITY**

- Just notice
- See what happens next
  - Not just mindful...
  - Investigating each experience
TRAUMA

• Relational issues
• Somatic challenges

WHAT IS TRAUMA?

• The goal of (trauma) treatment is to help people live in the present, without feeling or behaving according to irrelevant demands belonging to the past.

--- Bessel van der Kolk

CASE EXAMPLE

• EBT roll-out
• JCCO directed client into treatment
• Client reluctant to attend
• Harm

BENISH, IMEL, & WAMPOLD, 2008

• Treatment for PTSD is effective
• “Bona fide psychotherapies produce equivalent benefits for patients with PTSD”
• Much controversy

SEPTEMBER 11

• Critical Incident Stress Debriefing
• Some treatments cause harm
• Lilienfeld (2007)

ULTIMATELY

No intervention that takes power away from the survivor can possibly foster her recovery, no matter how much it appears to be in (his or) her immediate best interest.

--- Judith Herman, M.D.

• Reframe: Interventions that empower survivors foster recovery
IMPORTANT

- Not all trauma results in PTSD
- Trauma can have a devastating effect on life outside of PTSD

PREPARE MORE THAN YOU THINK YOU SHOULD

Strategy #5

SPECIFIC STEPS

1. Get into the mindset that you are creating new mindsets
2. 10,000 foot rule
3. Relax your body
4. Lower your shoulders
5. Slow your breathing
6. Reject all distractions
7. Spend 1st 20% of every interaction engaging
8. It’s hard to argue with a relaxed person

2013 PRACTITIONER’S DEFINITION

- Motivational interviewing is a person-centered counseling style for addressing the common problem of ambivalence about change.

2013 TECHNICAL DEFINITION

- Motivational interviewing is a collaborative, goal-oriented style of communication with particular attention to the language of change. It is designed to strengthen personal motivation for and commitment to a specific goal by eliciting and exploring the person’s own reasons for change within an atmosphere of acceptance and compassion.

THE SPIRIT OF MOTIVATIONAL INTERVIEWING

- Partnership
- Acceptance
- Compassion
- Evocation
USE ROUTINE OUTCOME MONITORING

Strategy #7

Outcome Rating Scale (ORS)
Looking back over the last week, including today, help us understand how you have been feeling by rating how well you have been doing in the following areas of your life, where marks to the left represent low levels and marks to the right indicate high levels. If you are filling out this form for another person, please fill out according to how you think he or she is doing.

Individually
(Personal well-being)

Interpersonally
(Family, close relationships)

Socially
(Work, school, friendships)

Overall
(General sense of well-being)

Session Rating Scale (ORS V.3.0)

Please rate today’s session by placing a mark on the line nearest to the descriptions that best fit your experience.

I did not feel heard, understood, and respected.

Relationship

We did not work on or talk about what I wanted to work on or talk about.

Goals and Topics

The therapist’s approach is not a good fit for me.

Approach or Method

There was something missing in the session today.

Overall

EMPATHIC ATTUNEMENT

EMPATHIC, ATTUNED INTERVENTIONS
✧ Unexpected
✧ Welcome
✧ Impactful

WHAT WE NEED ...
✧ Mindset
✧ Heartset
✧ Spirit
✧ Attitude
✧ Intention

COMPASSION

POLITICAL CLIMATE
✧ Coercion
✧ Shame
✧ Blame
✧ Threats
✧ Punishment
WE CAN LEAVE NO ONE BEHIND

SKILLS
- How could I make this problem worse?
- How does the behavior make sense?
- What are all the ways he/she feels two ways about his/her life?
- What are the positive goals for change?

TAKE-AWAY MESSAGES
- Creating new mindsets
- Go slow and listen long
- Spend 20% of session engaging
- Look for client confirmation
- Listen for ambivalence
- Dance with discord
- Respect the unexpected
- Be multi-modal and use your space
  - YOU are the most influential presence
